

CREDITS	METALCO PRODUCT	LEED POINTS
<p>MR Credit 4.1: Recycled Content: 10% (post-consumer + 1/2 pre consumer) Use materials with recycled content such that the sum of post-consumer recycled content plus one-half of the pre-consumer content constitutes at least 10% (based on cost) of the total value of the materials in the project.</p>	<p>All products in our line up can help qualify a building for LEED MR 4.1 and MR 4.2. Metalco products are made from recycled post consumer steel products.</p>	<p>1 Point</p>
<p>MR Credit 4.2: Recycled Content: 20% (post-consumer + 1/2 pre-consumer) Use materials with recycled content such that the sum of post-consumer recycled content plus one-half of the pre-consumer content constitutes an additional 10% beyond MR Credit 4.1</p>	<p>The content of recycled steel is 85% from which 65% are harvested from recycled motor vehicles.</p>	<p>1 Point in addition to 1 point from MR 4.1 for total of 2 Points</p>
<p>MR Credit 5.2: Regional Materials: Use a minimum of 20% of building materials and products that are manufactured regionally within a radius of 500 miles.</p>	<p>If your project site is within 500 miles from one of our production facilities. Check with our engineers for info.</p>	<p>1 Point</p>
<p>EQ Credit 4.2: Low Emitting Materials: Paint & Coatings Reduce the quantity of indoor air contaminants that are odorous, potentially irritating and/or harmful to the comfort and well-being of installers and occupants.</p>	<p>Qualifies if our products are installed in an indoor environment</p>	<p>1 Point</p>
<p>EA Credit 1.1: Optimize Energy Performance Achieve increasing levels of energy performance above the prerequisite standard to reduce environmental impacts associated with excessive energy use.</p>	<p>METALCO louver sunshades installed in a design to prevent solar heat gain could reduce buildings overall energy consumption thereby helping building to qualify for EA 1.1 credit</p>	<p>1 - 10 Points</p>
<p>EQ Credit 8.1: Daylight and Views: Daylight 75% of Spaces Provide for the building occupants a connection between indoor spaces and the outdoors through the introduction of daylight and views into the regularly occupied areas of the building.</p>	<p>METALCO louver sunshades can help designers offer such comprehensive daylighting by using exterior shading to combat glare and solar gain.</p>	<p>1 Point</p>

Please ask a METALCO design engineer to provide detailed project specific LEED explanations.
